

Susan B. Sinnott

University of Florida

CHE-0200838

- Three high-school students participating in the University of Florida Student Science Training Program (SSTP) worked in the Sinnott lab during June and July of 2004.
- The students worked closely with graduate student mentors and learned about computational modeling and simulation of materials. In particular, they ran calculations and simulations, analyzed the results, and made several oral presentations about their projects to their peers throughout the summer.
- Figure captions: Top (from left to right): Mr. Wen-Dung Hsu, a graduate student, and Mr. Michael Barash, a SSTP student working in the Sinnott lab. Michael studied ion-beam irradiation of polymer surfaces. Bottom: All the SSTP students who worked in the Sinnott lab in the summer of 2004 and their graduate student mentors.
- Communication from Mr. Barash in February indicated that he has been accepted into the selective Harriet H. Wilkes Honors College associated with Florida Atlantic University with an academic scholarship.
