

JACK SIMONS

University of Utah

CHE-0240387

For several years, Jack Simons, Henry Eyring Scientist and Professor of Chemistry at Utah, has written and maintained a theoretical chemistry web site

<http://simons.hec.utah.edu/TheoryPage> whose development was partially funded by an outreach supplement to an earlier NSF grant. This web site offers students an introduction to many aspects of theoretical chemistry and gives numerous links to sites of practicing theoretical chemists throughout the world as well as a wide range of other science-related links. In 2003, Professor Simons extended this outreach effort by publishing, with Cambridge University Press, a textbook entitled **An Introduction to Theoretical Chemistry** designed for senior undergraduate and young graduate students. Information about this text can be accessed through

<http://simons.hec.utah.edu/NewUndergradBook>

In June of 2005, Simons hosted an ACS PRF sponsored Summer School on theoretical chemistry with information available at <http://simons.hec.utah.edu/school>.
